

# ANIMAL SCIENCE AND MANAGEMENT MAJOR

## MAJOR SUBSTITUTIONS

Many UCD Majors and Minors incorporate credits earned while completing an internship and/or an independent research project. Students in some programs have been able to use their Washington Program Internship (WAS 192) and Research Seminar (WAS 199) credits as substitutions for their major or minor requirements.

*Check with your advisor to see if you can do this as well!*

## INTERNSHIP IDEAS

Some of the places in Washington DC where students with an interest in Animal Science and Management could intern include:

US Department of Agriculture  
National Aquarium  
Marine Conservation Biology Institute  
National Geographic Society  
National Wildlife Federation

Food and Drug Administration  
US Fish and Wildlife Service  
Humane Society of the United States  
National Zoo  
National Parks Service

This is not a complete list! Please e-mail at [washingtonprogram@ucdavis.edu](mailto:washingtonprogram@ucdavis.edu) or visit us in our offices on the 2<sup>nd</sup> floor of South Hall to learn about more internship opportunities.

## QUOTES FROM STUDENTS:

“After some time working in the National Zoo’s research lab, I was also able to shadow the head veterinarian and the rest of the staff at the veterinary hospital. Overall, I felt privileged to learn and gain experience from three different areas of the zoo: everything from having direct animal contact as a keeper aide, to setting up my own research projects at the lab, to clinical work at the veterinary hospital.”

“At the Humane Society of the United States, my specific assignments involved researching and compiling historical events and legislation relevant to pain and distress in research animals...I found it rewarding to research issues that interested me, and attending the conferences and conventions was enlightening and a good networking opportunity.”

“My experience with the Animal and Egg Production Food Safety Staff exceeded my expectations of what I would learn and do as an intern. I will continue to be employed by the USDA and remain at AEPFSS through next year.”
