

# AGRICULTURAL MANAGEMENT & RANGELAND RESOURCES MAJOR (Transitioning to Ecological Management & Restoration)

## MAJOR SUBSTITUTIONS

The Agricultural Management and Rangeland Resources major requires the completion of an internship (PLS 192) or research project (PLS 199). In most cases students can use their Washington Program Internship (WAS 192) and Research Seminar (WAS 199) credits as substitutions for this requirement.

*Check with your advisor before going to DC to see if you can do this as well!*

## INTERNSHIP IDEAS

Some of the places in Washington DC where students with an interest in Agricultural Management and Rangeland Resources could intern:

US Department of Agriculture  
National Wildlife Federation  
USDA  
US Department of Agriculture Food and Nutrition Information Center

US Fish and Wildlife Service  
UN Agricultural Development  
Inter-American Institute for Cooperation of Ag

This is not a complete list! Please e-mail us at [washingtonprogram@ucdavis.edu](mailto:washingtonprogram@ucdavis.edu) or visit us in our offices on the 2<sup>nd</sup> floor of South Hall to learn about more internship opportunities.

## QUOTES FROM STUDENTS:

“My expectations for my USDA internship were more than met. I went into my internship with the hope that I would get to at least do a few hands on things and learn a few new things. I left the internship with a whole new breadth of knowledge as far as areas of study for my major. This experience will also aid in my acceptance into graduate school in that I will have a unique experience that other applicants may not.”

“Now I have an understanding of the potential impact of policy upon industry, the general lack of food safety knowledge/practice among consumers, the pressures placed upon federal agencies by consumer groups, and the importance of open, receptive relationships between industry and government agencies. My experience with the Animal and Egg Production Food Safety Staff exceeded my expectations of what I would learn and do as an intern. I will continue to be employed by the USDA and remain at AEPFSS through next year.”
