

APPLIED MATHEMATICS MAJOR

MAJOR SUBSTITUTIONS

Many UCD Majors and Minors incorporate credits earned while completing an internship and/or an independent research project. Students in some programs have been able to use their Washington Program Internship (WAS 192) and Research Seminar (WAS 199) credits as substitutions for their major or minor requirements.

Check with your advisor to see if you can do this as well!

INTERNSHIP IDEAS

Some of the places in Washington DC where students with an interest in Applied Mathematics could intern:

Federal Reserve Board
US Naval Observatory
USDA
US Chamber of Commerce
Battelle

NASA
World Bank
National Science Foundation
Financial Management Service
National Economic Council

This is not a complete list! Please e-mail us at washingtonprogram@ucdavis.edu or visit us in our offices on the 2nd floor of South Hall to learn about more internship opportunities.

QUOTES FROM STUDENTS:

“At the Federal Reserve Board I had the chance to go to several conferences and forums and listen to people from all sorts of agencies speak about prevalent issues in consumer banking. This opportunity added a whole new dynamic to my experience in DC and was incredibly educational.”

“My internship at the US Chamber of Commerce will have a tremendous affect on my future academic and career plans. Working in a government department I was exposed to the politics involved with business and the economy. It was fulfilling to work for a department that attracts business and industries seeking to improve their markets, and I would hope in my future career that I would be able to work for a business that holds these same values.”

“Interning at NASA is the greatest thing I’ve done for my education since the start of college. My expectations were met and exceeded. My only advice for future Washington Center students: take initiative. If you show the bosses what you’re capable of, huge projects will land in your lap, and although you will be very busy, you’ll learn more than you ever could in a lecture hall.”
