

# ANTHROPOLOGY MAJOR AND MINOR

## MAJOR AND MINOR SUBSTITUTIONS

Many UCD Majors and Minors incorporate credits earned while completing an internship and/or an independent research project. Students in some programs have been able to use their Washington Program Internship (WAS 192) and Research Seminar (WAS 199) credits as substitutions for their major or minor requirements.

*Check with your advisor to see if you can do this as well!*

The advisor for Anthropology is:

HENRY McHENRY (203 Young Hall; 752-1588; [hmmchenry@ucdavis.edu](mailto:hmmchenry@ucdavis.edu))

## INTERNSHIP IDEAS

Some of the places in Washington DC where students with an interest in Anthropology could intern include:

National Archives  
National Geographic Society  
Smithsonian Institution  
Center for Science, Policy, and Outcomes  
Earth Force

National Museum of Natural History  
National Museum of American History  
National Academy of Science  
Carnegie Center  
Globe

This is not a complete list! Please e-mail at [washingtonprogram@ucdavis.edu](mailto:washingtonprogram@ucdavis.edu) us or visit us in our offices on the 2<sup>nd</sup> floor of South Hall to learn about more internship opportunities.

## QUOTES FROM STUDENTS:

“As a result of my research at the National Archives I have grown an even greater interest in researching history and anthropology. The ultimate goal of my research for the Congress Project goes to an educational teaching packet that will eventually be distributed to every high school in America. I have gotten really excited about the impact that this packet will have on students and how much value it will have on their lives.”

“From my internship with the National Museum of American History I learned that research is an important skill, and is important to develop. It was interesting to find information I needed when scouring large quantities of memoirs, diaries, and letters published by civil war soldiers about their wartime experience.”

“At the national Museum of Natural History I was given the opportunity to implement the laboratory and research methods that I learned in my physical anthropology courses to a real world setting. Working with leading researchers in field allowed me to really reinforce my interest in continuing my studies and grad school, and possibly a career in the field.”
